# DOUBLE SWEPT - T

A revolutionary design, available exclusively from JF Plastics. The Double Swept-T Junction allows power to be taken both ways from the source. This multi-function duct can be used in a range of utilities, especially in street lighting. It can also be used for CCTV and other cabling applications.

## Product Summary:

- ✓ Cables are protected by the duct
- ✓ The Double Swept-T minimises the time an excavation needs to be left open
- ✓ The Trench can be back-filled safely once the connection has been made
- ✓ The Double Swept-T minimises the risk of danger as the Power Cable is fed inside the bends of the Swept-T
- ✓ The legs of the Swept-T can be cut down on site to suit each and every connection
- ✓ The Branches are welded together for strength, but they are independent of each other
- ✓ Duct work can be cabled at time of installation or at a later date by using Marriage Couplers
- ✓ Less risk to the public
- ✓ Lifetime saving cost
- ✓ Less Haulage
- ✓ Range of colours available

***JF Plastics manufacture a range of other specialised products, please call for more details.***

- Twin Wall Bends • uPVC Duct Fittings • Valves & Flanges • Chambers & Access • Elbows
- Junctions • Puddle Flanges • Bespoke design • Saddles • Reducers • Spacers • Couplers
